

## Analysis of the Country Sales Data .

The goal of this project is to better understand which factors are most important in driving country revenue, and how those factors relate to country revenue

- What is the overall sales trend ?
- What are the top 10 Countries of sales ?
- What are the most selling Item\_Type ?
- Which are the most preferred Sales\_Channel ?

To start exploring this goal, I used (EDA)&(gruopby) with two feature to describe profit Total Domestic Gross as a function of the Budget of countries.

The figure shows the size of the profits in relation to the type of Item
